Errata
Rising Sun (2nd Edition) (as of March, 16 1998)

Annex A:
Leander First Group: Change Mk VII 6 inch guns to Mk XXIII 6 inch guns.

Japanese Taiyo CVL: Change the weapons line from "2 Catapults" to "2 Elevators."

The Hatsuharu class was fitted with the Type 3 Mk1 radar in 1942/43, not the "Type 13"

US Long Island-class CVE: Change the 5 inch gun's arc from F to A, and the 3 inch guns from P/S to PB/SB.

The US New Orleans class is fitted with Mk14 8 in/55 guns.

The US Bristol-class DD should be carrying Mk14 torpedoes

Annex B:
Beaufighter X: Change defensive armament to 1 .303 Vickers K in manual dorsal turret.

Martlet I, II, IV: Change the Damage Value from 6 to 8.

F4F-7 Wildcat: Change the Damage Value from 6 to 8.

F4U-1D Corsair: Change the Damage Value from 6 to 8.

Annex E1:
In CaS second edition, the damage point rating formula for torpedoes was changed from warhead (kg)/3 to warhead (kg)/4. Although the change was made in Annex J, it was not implemented in Annex E1, unguided torpedoes. The correct damage points need to be calculated for each torpedo by dividing the warhead weight by four.

Because of the poor design of British submarine fire control systems, although they can fire the Mk8 torpedo, they cannot set it with any gyro angle off dead ahead. The Mk8 was capable of accepting such settings, but the fire control systems were incapable of setting the weapon. This applies to ALL WW II British submarines.

The US Mk14's range/speed settings are mixed up. The correct values are 5000 yards at 46 knots and 9800 yards at 32 knots.

Annex G1:
There are Two Japanese Mk2 Mod2 radars listed. The second entry, with ranges of 22/11/5.5 nm should be deleted.

Scenario Booklet:
Force Z: Repulse took the hit from the initial pass by the high-level bombers

Battle of the Java Sea: HMAS Hobart was a Perth class. Exeter took a boiler room hit rather than a magazine hit.
Battle of the Sunda Strait: Perth led the way. Capt. H.A.L. Waller was senior to Houston's Capt A.H. Brooks.

The Loss of the Wasp: USS Duncan (Benson-Livermore class) should be added to TF-17.

Battle of Guadalcanal: Juneau was the other cruiser in TF 76.4 that had SG radar.

Strike on Shoho: Shoho should be listed as a member of the Zuiho class.

Thanks to Jim Broshot, Kevin Chaffee, Evan Duncan, Dan Foxman, Greg Kuntz, Jay Martino, and Chris Perleberg.
